Sat., Dec. 10, at 2 P.M.

Sale of School Lands.

There was keen competi-
tion at the sale in Edmonton
last week of the school lands
of the Province which were
offered. The lands in this dis-
trict and the Carvel district
brought good prices. From
the latter districts a big dele-
gation of Russians were in
attendance for several days.
For the Sw 11 53 2 5 \$57 an
acre was bid; for the Se of the
same section \$49 an acre was
fetched \$20 an acre Sw
29 53 27 4 \$37.50 an acre;
Nw 29 53 27 4 \$20 an acre;
while the west half 11 52 27 4
brought around \$35 an acre.
Quarters along the river bank
south went as high as \$40 an
acre.

FOR SALE, Delco Light Plant
complete; large cell battery; sell
less than half price. Dr Oatway,

Contractor and Builder.

LOCAL NEWS.

Mrs E Klapper returned on
Monday to her home at West-
lock, after a visit with her
daughter, Mrs H Heichen, at
Inga.

Mrs John Eberhardt left
Sunday for her home at Ed-
son.

Mr and Mrs Carl Enders
have taken up their residence
in the Boettcher house, on
Second St.

Mrs J A Berry and Mrs
Karl Propp are visiting with
friends in Duffield district,
this week.

Mr Lundy is confined to
the house, this week, with an
attack of la grippe.

Mr Cecil Umbach arrived on
Sunday, from Calgary.

Mr Conrad Spady, for whom
Auctioneer Zucht held a sale
last week, has gone to Wain-
wright district, to reside.

Mr Wm Barth, barber, of
Millet, will shortly join the
ranks of local hair removers.
With four or five barbers
working daily here, Stony will
soon have the reputation of
being a whiskerless cow town.

Christmas cards and Personal
Greeting cards; all prices
and colors; at the Drug Store.

Mrtin's Orchestra gave an
informal dance in Stony Plain
Monday evening.

It is reported that Henry
Enders has sold his farm land
south of town to Emil Ulmer.
This is a choice piece of prop-
erty and brought a good price.
Mr Enders is removing to the
Wembley district, to reside.

In Stony Plain district, on
Tuesday, Nov. 22, to the wife
of Henry Htenkel, a daughter.

A Bazaar will be held in
Oppertshausen's Store on Sat-
urday, Dec. 10, at 2 p.m., by
the Ladies' Aid of St. Matthe-
w's church.

Owing to the stormy weath-
er and blockaded roads on
Friday last, the meeting of
Inga Councillors, billed for
that day in Stony, had to be
postponed. Councillor Howat
was present, having come on
the railway.

Secretary Pidgeon will be
in Stony Plain all day Mon-
day, Dec. 12, and up to noon
Tuesday, Dec. 13, for the pur-
pose of collecting taxes.

A wedding was celebrated,
Sunday evening last, at the
home of Mr A H Schinke,
south of Duffield, when Mr
Schinke was united in mar-
riage to Mrs Bertha Kriwald,
of Duffield. The ceremony
was performed by Rev C H
Reppert, pastor of the Glory
Hills Reformed Church. A
wedding supper was given,
after the ceremony, at which,
among those present were:
Mr and Mrs Percy Faulks of
Duffield, and Mr and Mrs P
Miller.

If your eyes bother you, or
you suffer from headaches,
why not have your eyes at-
tended to by an expert? M M
Mecklenburg, eye specialist,
will be in Stony Plain on Fri-
day, Dec. 16th.

Canada's Gold and what it means to You!

Never in the history of a country has any industry shown such phenomenal growth as that of the Canadian Mining Industry during the past few years.

Never before in the history of any country or industry have such unbelievably large profits been returned to the individual investors.

More important still! NEVER BEFORE HAS THERE BEEN A SITUATION SUCH AS THIS WHERE—A MAN WITH ONLY LIMITED CAPITAL MAY INVEST A MODERATE AMOUNT WITH SUCH EXCEPTIONAL OPPORTUNITY FOR LARGE RETURNS FROM HIS INVESTMENT!

There is no reason for not knowing what is going on! Upon receipt of a letter or postal card, the company named below will cheerfully furnish reliable information to anyone interested in learning full details of one of the most outstanding mining developments of recent years in the entire North country.

THE NORTH AMERICAN DEVELOPMENT LIMITED
CANADIAN PACIFIC BUILDING
TORONTO, ONTARIO

On To The North!

Whatever misgivings the people of Canada have had regarding the building of the Hudson Bay Railway and the creation of a worthwhile port on the Bay are being rapidly dispelled as week after week announcement is made of conditions and discoveries and new developments in the vast area to be opened and served by the new route.

Times past pessimistic opinions were held and views expressed relative to Canada's future and the doubtful success of many Canadian enterprises. The prairie section of Canada would never, according to official reports to the British Government, be fit for agricultural settlement. Later, the construction of the C.P.R. was described as the apex of folly—it would not pay for axle grease. Still later, it was emphatically declared that wheat could not be successfully grown west of Moose Jaw. There was a time when the idea of making Montreal an ocean port was openly ridiculed, the word being asked to consider the impracticability of creating an ocean port hundreds of miles from the sea up a river frozen solid for many months of the year.

But Western Canada has become the granary of the Empire and has made Canada the greatest wheat exporting country in the world; hundreds of millions of bushels are raised west of Moose Jaw; the C.P.R. is the greatest transportation system under one management in the world today; Montreal stands second only to New York as the chief port of the North American continent.

And now that construction of the Hudson Bay Railway is being energetically proceeded with, enthusiasm and businesslike methods having replaced former lukewarmness and decisions based on guesswork, the old opposition is dying away as step by step former fallacies and misconceptions are removed. So great has been the progress made in this direction that all political parties are outspoken in support of and pledged to the project, thus removing it from the arena of partisan controversy.

The railway has been completed to within approximately 150 miles of Churchill, and contracts have been let for this additional mileage. Work on the creation of an up-to-date, fully equipped port has commenced. The continuous aerial survey of the straits now in progress has already brought the information, surprising to many doubting Thomases, that both Bay and Straits have remained frozen from ice for a much longer period than was formerly believed to be the case.

Opponents of the Bay project always contended that navigation would be so perilous, and, as a consequence, insurance rates on boats and cargoes so high as to be prohibitive, that no shipping company would undertake to establish a service on such a route. But already a responsible steamship company has opened negotiations with the Government for the establishment of a line of vessels operating in and out of Churchill, while insurance authorities have announced that there is no reason why the rates of insurance to be charged should be unduly high or a deterrent to the success of the route.

As if these things were not in themselves sufficient to justify the expenditure on the road to the Bay, there comes official announcement of the completion of arrangements between the Dominion Government, the Manitoba Government, and the wealthy Whitney interests of New York for the building of a branch line of railway from The Pas on the H.B. line to the Pin Point mining area which will be a feeder to the Hudson Bay Railway and provide an enormous and paying traffic.

This contract further involves the development of a great power plant at White Mud Falls near the Hudson Bay line, the construction of a proper transmission line to the Pin Point, and the establishment of great pulp mills, all of which will provide a huge volume of freight quite apart from the through traffic to and from Churchill. This subsidiary expenditure is estimated to cost no less a sum than fifty to sixty millions of dollars, and provides for extensive northern development which could not possibly be undertaken without the Hudson Bay Railway.

And it is confidently predicted that this is only a beginning, and that with the completion of the Hudson Bay Railway, and this new branch line feeder to it, there will follow a new era of exploration and prospecting that will result in uncovering as yet unknown sources of great mineral wealth.

Canada in the past has suffered the disadvantage of lacking depth commensurate with its great breadth. Development to the north in the next decade or two gives rise to promise of removing that disadvantage.

It is needless for a man to have an aim in life if he has no ammunition to back it up.

Wise is the man who does of his own free will that which he would otherwise shortly be compelled to do.

Reward Wheat Shows Highest Average Protein Content of Any Western Prairie Grown Variety

Reward wheat shows the highest average protein content of any wheat grown on the Canadian prairie, according to chemical tests just completed at Ottawa.

Reward wheat, centre of controversy at the Royal Winter Fair, stands higher than Kotsa Ruby, Marquis, Garnet and Kitchener, according to these tests.

Samples of Reward wheat from experimental farms and stations in Manitoba, Saskatchewan and Alberta have shown an average protein content of 17.62 per cent., regarded as remarkably high for flour-making qualities. Other wheat varieties, tested on a similar scale, contained protein from 14.64 per cent. to 17.29 per cent.

At the instance of the Dominion cerealists an analysis of a series of wheats grown on 13 experimental farms and stations from Prince Edward Island to British Columbia has been made during the past year and a copy of the Dominion chemist's report has just been received in Regina.

The series consisted of 165 samples, comprising 45 varieties, all taken from the crop of the same year.

Chief objects of this study were to ascertain varietal differences, chiefly in protein content, under the same environmental conditions, and also to find out the influence of different environmental conditions on the character of the grain of the same variety.

Marquis and Garnet varieties, the most commonly sown in the West at present, came in for special attention. Reward being still regarded by Ottawa authorities as an uncompleted experiment. The results of these tests are not held conclusive by the Dominion chemist, who reports that they should be supplemented by those of a future series before their detailed consideration with a view to definite conclusions, would be justified.

Reward wheat showed a great consistency in protein content in samples taken in Manitoba and Saskatchewan. It ranked highest among the 29 samples taken at Brandon, first among 13 samples from Scott and first of 14 samples from Indian Head. It was a close second at Beaverbridge and second too, at Morden. At Redberry, S.W.T. Current and Leithbridge, it ranked fourth.

A report from the Minnesota State Experimental Flour Mill at Minneapolis, on Marquis and Garnet wheats grown at Scott, Sask., shows the grains to have rich flour-making qualities. These samples, were considered almost alike and both were classed as "unquestionably strong" with excellent bread-making properties. The analysis of the wheat showed them to contain less than 15 per cent. protein. Reward in early tests, has been shown to have much more than that.

Storms Caused By Lack Of Forest

Trees Act As Lightning Rods Says French Expert Of Wireless

Trees are lightning rods and the intensity of weather is due to the destruction of forests, says Edmond Branley, France's grand old man of wireless.

"If there are no longer seasons," he says, "deforestation is the principal cause. It is indeed, alone, not the sole cause."

"Trees on the heights with their pointed tips toward heaven and their roots deep in the damp ground, are nothing less than so many lightning rods, constantly discharging into the earth the atmospheric electricity and thereby preventing its accumulation in the clouds, an accumulation that would cause terrible storms. In wooded districts there was calm, but now that the woods are being cut down there are constant hard storms."

Could Not Beat Birds

Eric Gen, C. R. Brooke, of London, Conservative member of Parliament and sportsman, recently wagers that he could beat carrier pigeons in a cross country race. He travelled 175 miles and turned loose 400 birds, they sped home by motor car and fast train. The whole flock had arrived an hour before the speeding general.

A good neighbor is one who lacks interest in affairs that are none of his business.

Age Of Steers To Feed

Two Year Old Steers Make the Greatest Gains

In selecting steers for feeding work, the age of the animals is an important consideration. All things considered the average feeder would be well advised to feed two-year-olds. In the opinion of the authors of an Experimental Farms bulletin on the "Winter Feeding of Beef Cattle in Ontario." The bulletin gives an account of experiments in feeding steers of different ages. Over a six year period the two-year-olds made the greatest gains, but the yearlings were a close second and the three-year-olds were not far behind. The younger steers had the advantage in the cost per pound gain, as the cost increases with age. The lower feeding cost of the younger steer is due to the fact that he is growing and putting on fat at the same time while the three-year-old makes his gains by putting on fat alone. The younger steer, however, needs a somewhat more nutritious ration than the older one, the latter making the best use of coarse roughage.

A Smart Tunic Blouse and Skirt

The tunic blouse is quite new and smart this season, and the one pictured here, having a square neck and loose sleeves, is exceedingly chic. Bands of ribbon, with the addition of buttons or buckles, form an attractive trimming, and a belt fastens in front. No. 1682 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 2 1/2 yards 39-inch, or 1 1/2 yards 54-inch material, and 4 yards 2 1/2-inch ribbon. Price 20 cents the pattern.

The skirt has six plaits at the left side, and is joined to a dargilled bodice top having straps over the shoulders. No. 1232 is in sizes 34, 36, 38, 40 and 42 inches bust. Any size requires 1 1/2 yards 39 or 54-inch material, and 1 yard 36-inch lining for the bodice top. Price 20 cents the pattern. Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress maker. Price of the book 10 cents the copy.

How To Order Patterns

Address—Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg

Name

Town

London will have this year 14 new moving picture theatres of seating capacity of 2,500 or more, the total cost being approximately \$15,000,000.

If all that is being said is true in regard to aviation, we shall be very much up in the air next year.

Danish Scientist Makes Interesting Discovery

Found In Brussels Head Of Famous Statue Owned By Denmark

An interesting piece of archaeological surgery, which gives hope that the Venus de Milo may some time be supplied with arms and winged Victory for a head, has been accomplished here through the kindness of observation of the Danish scientist, M. Blinkenberg.

Mr. Blinkenberg, who made a long study of ancient Greek sculpture, particularly various statues of Aphrodite, visited the Museum Clusianum at Brussels recently. In studying the famous torso of the Venus of Cnidus, one of the most precious relics in the museum he noticed that the head seemed to have been broken off in precisely the same manner as the head of a Venus he had studied in Copenhagen.

Returning to the Danish capital he had a plaster cast made of the head and shipped to Brussels, where it was found that the head fitted exactly in the decapitated torso. Arrangements have been concluded for an exchange of objects with the Copenhagen museum so that the Venus of Cnidus, with the head restored, may become one of the most beautiful statues of Venus extant.

Roughage Ground Or Fed Whole

Experiments Would Indicate That Grinding Roughage Does Not Improve It

The results of an investigation into the advantages and economy of grinding roughages for dairy cows, conducted at the Central Experimental Farm, show that the grinding of the rough feed did not add materially, if at all, to its feed value. The details of the investigation are given in the latest report of the Dominion Animal Husbandman. Among other things it was demonstrated that cut corn fodder is not of as high value for milk production as corn silage. When corn fodder and mixed hay were both cut and ground and fed in comparison with silage and the same mixed hay, not cut or ground, the latter ration proved to be slightly the more efficient for milk production. These results indicate that grinding roughage does not improve it. On the other hand, the extra labor of cutting and grinding adds materially to the cost. It can safely be said, therefore, that under normal conditions, it would not be economical to grind rough feed, at least for dairy cows, particularly since there is no class of stock better adapted to grinding their own feed.

Japanese Children Send Gifts

As a Christmas gift to the children of the United States from 5,000,000 Japanese children, fifty-seven dolls have been made by the most expert craftsmen in Japan. They will be a reciprocal remembrance for the 13,000 "friendship dolls" sent by children in the United States to the Japanese doll festival last March. Extensive wardrobes of silken kimonos and chiyogami, with trunks and appropriate furniture have been supplied for each doll.

The more a man gets the more he wants—unless a police judge is dealing it out.

A hypocrite is a man who pretends to be what he can't—with the accent on the can't.

Winners of Boys' and Girls' Swine Club Competitions

Winners of the Manitoba and Saskatchewan championships of the Boys' and Girls' Swine Club competitions along the lines of the Canadian National Railways, who attended the Royal Exhibition at Toronto as the guests of the Railway, from left to right: J. D. Gull, assistant to the agricultural agent, Canadian National Railways, Winnipeg, who accom-

Makes Plea For Eskimo, Who Are Needed To Develop The Great Northern Areas of Canada

Reasons Are Numerous

Why City Men Move To Farms and Farmers To City

An attempt by the Department of Agriculture to find out why the farm boys long for the city and the city dwellers long for the farm has resulted in the disclosures of a wide variety of reasons.

Opportunity for making a better living on the farm than in the city was found to be the principal reason for movement from city to farm which, the department survey said, was composed largely of former farmers who had been disillusioned by city life.

The high cost of living in cities drove some persons to the farm, and others were induced to take up farming for the satisfaction of an independent life.

Some farmers move to town because they cannot make farming pay, or are drawn to the city by the lure of a larger income. Others move because of better school facilities for their children; others still because of being physically unable to continue farming and a small number because of financial inability to retire.

A steady weeding out of older people on the farm who are replaced in part at least by men and women in earlier life, was found by the survey. Although the total farm population is reduced in numbers the report stated, the result is the development of a more vigorous and efficient agriculture. A detriment, however, is that those who retire take with them to the city a volume of financial wealth and experience, the loss of which retards rural institutional improvements.

Wild Flowers Of The Rockies

Abundant Flora Found Amid the Higher Altitudes

One of the great charms in the national parks in the Canadian Rockies is the variety and beauty of the wild flowers. At first thought one would perhaps not expect to find an abundant and interesting flora amid the higher altitudes, but, strange as it may seem, the wildflower gardens which bloom above the clouds in the upper regions are among the most beautiful in the world. Over five hundred varieties have been identified by botanists, and their exquisite color, fragrance, and delicate loveliness add the last touch to the charm of that wonderful region.

Arctic Party "Frozen In"

A wireless message from the Mac Millan expedition in the Arctic region was picked up at Magnolia, by George Warren, amateur radio operator, 23 years old, he reported. It read: "We are within a few degrees of the Pole and all is well. We are frozen in and will not be out until next Spring. At the present time the Arctic is under a mantle of the six month night."

In Austria all women in government employ must be addressed as "Frau" regardless of age and whether married or unmarried.

Action by the Dominion Government to preserve Canada's dwindling Eskimo population was urged by Capt. H. T. Munn, F.R.G.S., pioneer explorer of the Northwest, in an address before the Canadian Club at the Windsor Hotel, Montreal.

Canada's Eskimo population is now 5,600, as compared with between 10,000 and 15,000 fifty years ago, said Capt. Munn. To prevent further dwindling in numbers he recommended that Canada adopt successful measures used by the United States in Alaska and by Denmark in Greenland.

That herds of reindeer should be imported into the Canadian Northwest territory east of the Mackenzie River to the Hudson's Bay and Davis Straits, was the first recommendation of the speaker. He cited the example of Alaska. He said that 32 years ago 1,280 reindeer had been imported into Alaska, and from that number had sprung 875,000, the number of reindeer now in Alaska. With the growth of the reindeer stock had come prosperity to the Eskimos of Alaska, who now numbered 12,000.

Secondly, Capt. Munn would have Canada follow the example of Denmark in Greenland and prevent exploitation by white men in the far North. Denmark found the Eskimos in Greenland in 1880 to be "dirty, debauched and dwindling," declared Capt. Munn. The Danes ousted white traders from the territory, and formed a government trading company on behalf of the Eskimos which would accomplish the same purpose without exploiting the natives. The 1920 census showed the Eskimos in Greenland had increased to over 18,000, and were "cleanly, contented and prosperous," said Capt. Munn, in advocating this policy for Canada.

It is to Canada's advantage to preserve its Eskimo population, in the opinion of the speaker. He called it bad morals and bad business to neglect them. Great areas in the northwest awaited development, and this could not be done to the advantage of Canada without the aid of the Eskimo.

It was pointed out that one-third of the total area of Canada lies in the Northwest Territories, that section comprising 1,300,000 miles of the Dominion's 3,860,000 miles. This was the natural habitat and home of the Eskimo. Its commercial future seemed assured, as it offered minerals, furs, and a territory splendidly adaptable for reindeer development.

As samples of exploitation of the territory, Capt. Munn cited the gradual termination of a cash bar and wild life. He called it the "rubber extermination of the caribou," which took away the source of the best clothing for the northern territories.

Regarding wild life exploitation, he said that in the last four years over five million dollars' worth of white fox had been taken out of the Northwest Territories. This represented 120,000 animals. If the rape kept up foxes would become scarce, except in remote parts of the country.

Stories were told of the hospitality and simplicity of the Eskimos, through which Capt. Munn found another avenue of expressing his favorable attitude to the Eskimo and his conviction that they should not be neglected by Canada, but assisted in every way.

Brooms have been replaced by vacuum cleaners in the barracks of the French armies.

The Channel Swimmer—50,000 are giving up!" Yes, for today. I will continue tomorrow.—Journal Amusant, Paris.

New Ruling For Settlers

Will Receive Medical Certificates Before Leaving For Canada

Interviewed in London on the recently announced intention of the Canadian Government to establish in Great Britain, Canadian medical officers for examination of intending settlers for the Dominion, Sir George McLaren Brown, European general manager, Canadian Pacific Railway, said that the new plan is being put into effect with the object of averting possible expense and waste of time to the migrant and of avoiding the possibility of rejection on arrival in Canada through failure to comply with Canadian medical regulations.

Under the new plan all who desire to settle in Canada will be medically examined free of charge before leaving their homes. This examination will be final and there will be no further examination to undergo on arrival at a Canadian port. It will also avert possibility of intending migrants giving up their positions or selling their business until they have passed the Canadian doctor.

New Distress Call For Radio Telephony

"May Day" Is Equivalent To SOS In Telephony

A distress call for use in radio telephony and to be the exact equivalent of the Universal SOS in telegraphy has been advised by the International Radio Conference here and has been incorporated in the new international wireless convention.

The new call for help is "May Day" to be spoken through the broadcasting apparatus. This would be followed immediately as in the case of a SOS by details as to the location of the origin of the distress call.

"May Day" is the phonetic spelling of the French word "maler", meaning "help me."

George Sawyer, a member of the St. Noras Lake hunting party of Haliburton, Ont., was fortunate in securing a freak of the deer family in the form of a white buck. It was exceptionally large, weighing over 300 pounds.

The post of gold commissioner in the Yukon territory, which is now vacant, it is understood, likely be filled by a promotion from within the civil service. The Yukon is administered by the department of the interior at a cost of \$180,000 a year.

In the last year, 147 Catholic priests have been executed in Mexico, W. F. Montavon, of the National Catholic Welfare Conference, of Washington, told members of the Monday Club, an organization of social workers in New York.

More than half a million aliens were admitted to the United States during the 1927 fiscal year, and the number was considerably greater than during the previous year. The figure were 538,001 admissions in 1927, and 496,106 admissions in 1926.

Ronald Marland, son of John Marland, Edmonton's city architect, has been selected as Alberta's Rhodes scholar for 1928, and will proceed to Oxford next autumn. This is the 19th selection made at the University of Alberta.

Miller's Worm Powders will not only expel worms from the system, but will induce healthy conditions of the system under which worms can no longer thrive. Worms keep a child in a continual state of restlessness, and there can be no comfort for the little one until the cause of suffering be removed, which can be easily done by the use of these powders, which are very effective.

High and low tides may be predicted two years in advance for any port in the world by a recent calculation invention, consisting of 35,000 parts.

Rheumatic Pains

Gentle massage with Minard's will work out stiffness and drive away pain.

SUNDAY SCHOOL LESSON

DECEMBER 11

ISAIAH COUNSELS RULERS

Golden Text: "Thou wilt keep him in perfect peace, whose mind is stayed on Thee: because he trusteth in Thee."—Isaiah 26:3.

Lesson: Isaiah, Chapters 7, 21, 36 and 37.

Devotional Reading: Psalm 21, 1-7.

Explanations and Comments

I. King Ezekiel Appeals To Isaiah To Pray To Jehovah For Deliverance From Sennacherib, verses 1-13.

II. The Prophet's Answer, verses 17-27.—"Thou shalt say to your master, 'Behold, I have heard the voice of Jehovah, and I will cause him to fall there by the sword in his own land.' The 'spirit' was that of alarm. What the 'ridings' were is uncertain. To quote G. W. Blaine: 'It chapters 36 and 37 are a story, 'ridings' must refer to the news of the approach of Sennacherib, verse 9. If verses 1-7 here are independent of verses 3-6, the rumor probably relates to the tidings from home of a rebellion in Babylon, where, after expelling Merodach-baladan in 703, he had set up a usurper, who, shortly afterwards revolted, and against whom he directed a campaign in 701. In the combination of the narratives mention of the fulfillment of the prediction about the rumor may be overruled, and the return of Sennacherib to his own land is described in verses 37, 38, which form the sequel of this story.'

Isaiah's vivid fact in Zion's violences does not blind him to the opening of a new era in northern entrance. It is in one of his passages of warmest exaltation about Zion (10:32) that he describes the easy advance of the Assyrian to her walls. He and other prophets frequently recognized how swiftly the military powers will overrun Judah; and when they expect Jerusalem from the consequences, it is not because of her national strength, but with in the direct intervention of God Himself. So at last it happened. In the great crisis of her history, the invasion by Sennacherib, Judah was saved, as England was saved from the Armada, neither by the strength of her bulwarks, for they had been burst, nor by the valor of her men, for the heart had gone from them. It was the help that came from God. He Himself crushed her insolent foes in the moment of their triumph."—George Adam Smith.

When Holloway's Corn Remover is applied to a corn it kills the roots and the callosity comes out without injury to the flesh.

Hopes League Can Avert War

Former French Delegate Says 1935 Will Be Crucial Year

The United States will not be on the same side as Great Britain in the European war, Henri de Jouvenel, former French delegate to the League of Nations, predicted in a letter read at the International War Danger Conference at London.

M. de Jouvenel, who recently resigned his League post as a protest against the policies pursued at Geneva, was to have addressed the conference, but sent a message which was read instead.

The French statesman pointed to the holding up of the recent naval conference and said:

"Naval rivalry brings in its train concurrently with the growth of land armaments, rivalry of great states which are potential foes."

He predicted 1935 as a crucial year, until which the peace structure would hold good, but expressed the hope that by that time the League of Nations would have gained the authority necessary to prevent the recurrence of war.

Is Member Of Crew

Lady Cobham is accompanying her husband on his present important flight, not as a joyrider, but as a member of the crew. Her work before to act as secretary to Sir Alan, to serve as cook and to be ready to give first aid in case of accident. The plane is equipped with cooking apparatus which can be used during flights and this Lady Cobham will superintend.

Growing Trees From Seed

The Land Department of British Columbia has leased a plot near Victoria city where forest trees will be grown from seeds and planted artificially to supply timber supplies for future generation. The trees will then be planted in various government timber reserves within the province.

Cold Relieved or Money Back

Everywhere men, women and children, are finding relief from Coughs and Colds of all kinds by taking BUCKLEY'S Mixture. Everywhere druggists are selling "Buckley's" under positive guarantee. The first trial will show how different it is—and there are 40 times in a row without this proven conqueror of colds.

Scheme Is Proving Success

Socialistic Rule Has Passed Experimental Stage In Vienna

The city of Vienna has just entered upon its tenth year under Socialist rule. It is the only great city of millions of inhabitants which has been governed by a purely Socialist majority for so long a time—the only place where Socialist experiments have had a chance to be conducted upon no pretence of a scale and thereby develop beyond the experimental stage into what, from certain definite points of view, must be regarded as success.

Probably no city outside of Russia has had more hostile criticism than Vienna during the past decade. It has been denounced as Bolshevik; as a city being ruined by its rulers. Yet today students of municipal government come from all parts of the world to the Vienna town hall admittedly to learn.

The first striking fact is that Red Vienna is as far removed from Red Russia as the poles. In Vienna, in fact, nothing is forbidden in the social order, provided one is able to pay. It all depends upon that. On the other hand, the doctrine of Kary Selts is definite minimum happiness is due to every one and for that every one shall pay. Therefore, one may retain servants if he deems that number necessary—and pay a tax sufficient to maintain an entire ward in the children's hospital for a year. But upon the theory that human service is necessary, servant No. 1 is not considered a taxable luxury.

One may own one automobile or twenty, providing one pays \$20 per horsepower annually. One may own a car, but one must have a license, and pay an annual tax of \$50, or may keep a horse for commerce and pay a tax of only \$5, or may own a horse to till the soil and pay no taxes whatever.

Undoubtedly in some ways—perhaps in many ways—the new regime is still groping with difficulty. But, as the city fathers maintain, it is only nine years since the revolution and only seven years since the inhabitants have been able to get good square meals, therefore more time is needed to solve all problems.

Watches and clocks made in this country in the past year had a value of nearly \$2,000,000, the production breaking all records.

TORTURED FOR SIX MONTHS

Maritime Man Completely Relieved of Kidney Trouble by Gin Pills

When kidneys are inflamed or clogged life becomes a misery, as Mr. W. McArthur of St. John, N.B., realized. Fortunately, he also discovered Gin Pills, and gratefully wrote:

"I suffered for six months with kidney trouble. Doctors said I would have to have my back cut. I was unable to get on my feet. I was advised to try Gin Pills by the druggist. After taking three boxes I had no more trouble."

Mr. McArthur is not the first person saved from the surgeon's knife by Gin Pills. For years, Gin Pills have relieved acute kidney conditions. Never neglect backache, headache, brickbat urine, dizziness, spots before the eyes, painful, scanty or too frequent urination, Noddy's warning of kidney derangement. Pay safe. Take Gin Pills. 50c a box at all druggists. National Drug & Chemical Co. of Canada, Limited, Toronto, Ontario.

Teaching Hatred Of Britain

Reds Spending Unlimited Funds In China Says General Sutton

"The whole of Mongolia is now in the hands of the Bolsheviks and they are sending hundreds of agents supplied with unlimited funds into Southern China with the idea of raising hatred against Great Britain," General F. A. Sutton, picturesque soldier of fortune and promoter, told the Ottawa branch of the Engineering Institute of Canada.

The man, who for six years was military adviser to Marshal Chang Tso-Lin, head of the Peck government, declared that he had seen orders from the Moscow government, "directly advocating wholesale murder to stir up anti-British feeling."

According to General Sutton, 99 per cent of the people of China were hopelessly poverty stricken. The urgent necessity of getting something to eat was the main consideration of the bulk of the population.

General Sutton thought the main source of trouble in China as it affected Great Britain was in Britain's lack of a strong policy. To a great degree the fact that practically the whole of Southern China was now pure Bolshevik came as a result of this policy, he declared.

Question Of Naval Limitation Shelved

Further Conference May Be Called Within Two Years

No negotiations in connection with a further conference on the question of naval limitation have been begun are any contemplated for the immediate future, the Canadian Press learns. However, there is a definite feeling in British diplomatic circles that another conference, say in 1929, might produce valuable results inasmuch as it might considerably influence the cruiser program which otherwise would be in the process of being carried out two years later, when the Washington conference agreement will be due for review.

The decision not to proceed with two of the three cruisers which were to have been laid down this fiscal year is regarded as a gesture of the British Government to preserve a living interest in the proposals for armament reduction.

Minard's Liniment For Neuralgia.

Laundry Run By Peerses

Solicits Patronage From Society

People Residing In Mayfair Bedside telephones are ringing early these Monday mornings in Mayfair and a woman's voice says firmly, "My dear, I want your washing."

Belongs to Lady Ouseley, a peeress and a member of West End society, who has started a laundry.

She takes this method of coaxing her friends to sample her venture, assuring them that her laundry is a place where backs will come off white waistcoats and where there will be no laundry marks splashing handkerchiefs. Her husband, who is heir to the earldom of Tankerville, is London's pioneer aerial taxicab driver.

The Arctic tern, which flies from the Arctic zone to the Antarctic in its annual migration, covers a greater distance than any other bird.

The NEW CAR

INTRODUCING A FINE CAR IN THE LIGHT CAR FIELD

THIS entirely new car surpasses the accepted standards of light car accomplishment; sweeps aside all boundaries of price class; establishes a new standard of acceleration, speed, power and smoothness. Heretofore the following characteristics have been combined only in expensive cars.

Speed—better than a mile a minute.

Acceleration—5 to 25 miles per hour in high gear in 8½ seconds.

Endurance—this car will travel all day at 50 miles per hour without strain on motor or chassis.

Riding comfort—flexible springs and four hydraulic shock absorbers permit comfortable travel at high speed over the roughest road.

Roadability—this car's low center of gravity holds it snugly to the road on an unbanked turn even at high speed.

Power—in deep, loose sand with the front wheels cramped and from a dead stop, the car will turn in a tight circle, forward or reverse, without effort.

Effective braking—the instant response of mechanical, four-wheel brakes with dual control ensures positive braking for any emergency.

Positive steering control—A relaxed hand on the steering wheel will hold the car steady in loose sand and over bumpy roads. Turning radius 17 ft.

Economy—30 miles per gallon of gasoline, plus the well known economies of Ford car maintenance.

Appearance—coach work of pleasing proportions, tastefully finished in an extensive range of color combinations of durable satin lacquer.

Quietness—Vibration in the engine is practically negligible. New final drive is exceptionally quiet. Double-ply anti-squeak tape, asphaltum treated fabric and hardwood blocks between body and frame minimize body noises.

Motor

Make and Model—Ford "A"
Four Cylinders—Bore 3½"; Stroke 4½"
Unit Construction
Pump and Thermo-Syphon Cooling
Pump, Splash and Gravity Lubrication
Single Coil Distributor Ignition
Sliding Gear (3 speed) Transmission
Multiple 2 Plate Dry Disc Clutch
Crankshaft—Statically and Dynamically Balanced
High and Low Speed Jet Carburetor (hot-spot manifold)
Aluminum Pistons
Oil Indicator
Two Blade Aeroplanes Type Fan
Bakelized Fabric Timing Gear
Carbon Chrome Nickel Alloy Valves

Performance

Acceleration—5 to 25 M. P. H. in 8½ Seconds
50 Miles Per Gallon Gasoline Consumption

Your local Ford dealer will give you prices and complete details—See him today.

Engine—At 2200 revolutions per minute the new four cylinder engine develops 40 H. P. This revolution speed is low for such power and sets an entirely new standard for light car speed and acceleration, enduring quality and operating economy.

Engine lubrication—Combination of pump, splash and gravity feed thoroughly lubricates all frictional surfaces regardless of road grades.

Cooling system—Combination water pump and Ford thermo-syphon system doubly insures ample radiation. Engine warms up quickly but will not overheat.

Electrical system—The new Ford designed distributor is placed on top of engine permitting direct connection to spark plugs by means of short bronze bands. The single coil is protected by a waterproof case. Co-incidental lock on ignition circuit is theft proof. The powerful starting motor and dependable generator are both of Ford design.

Clutch and transmission—Patterned after the famous Lincoln, these units give an operating ease never before found in moderate priced cars. The nine plate multiple dry disc clutch and the selective transmission are designed to make shifting of gears remarkably easy and simple. Getaway, unexcelled by any car made today, is just one of the many advantages. Three speeds forward and one reverse. All gears are made of heat-treated chrome alloy steel. The only light car in which transmission shafts are mounted on ball and roller bearings.

Rear Axle—The axle shaft itself carries no weight as the ¾ floating principle places the weight of the car on the axle housing. Flexible roller bearings minimize rear wheel friction. A Torque Tube drive and spiral bevel gear are additional features.

Springs—Transverse semi-elliptic design. Relieved of all driving strain, they perform the sole function of cushioning road shocks. The transverse type of spring helps to prevent a large amount of frame distortion, makes four-wheel brake operation more efficient, gives easier steering and reduces unsprung weight.

Chassis lubrication—Alemite-Zerk pressure system.

Equipment

Starter
Foot Accelerator
One Piece Windshield Sun Visor
Theft Proof Ignition Lock
4 Hydraulic Shock Absorbers
Wide Range of Color Options

Chassis

4 Wheel Brakes—Mechanical Internal Expanding Type with Automatic Equalizer
Springs—Transverse Semi-Elliptic

Full Crown One Piece Fenders
Gravity Feed Fuel Tank
Ignition Wires Enclosed in Flexible Steel Tubing
Steering Gear (Irreversible)—Worm and Sector Type
Acorn Design, Nickel Plated Headlights
17½" Steering Wheel
Alemite-Zerk Pressure Lubrication
Body and Chassis Insulated to Prevent Noise
Wheel Base 103¼ Inches
Turning Radius—17 Feet
Tire Size—30 x 4.5
Road Clearance—9¼ Inches

FORD MOTOR COMPANY OF CANADA, LIMITED, FORD, ONTARIO

U. S. VESSELS SEIZE RUM SHIP ON THE HIGH SEAS

San Francisco.—That the Government has carried its war against liquor smugglers to the high seas with regard for the 12 mile limit in cases where the ships involved are known rum-runners, became apparent here as Federal officers discussed the seizure of the freighter *Federalship*, owned by the Consolidated Exporters, Inc. of Canada, 300 miles off San Francisco, with upwards of \$1,000,000 worth of Scotch whiskey aboard.

The seizure was conducted under orders from Lieutenant Frank Austin, aide to Captain F. G. Dodge, district coastguard commander.

W. B. Hamilton, collector of customs here, although disavowing any connection with the seizure, said he "suspected" it was made as the result of an understanding among the governments of Canada, the United States and Panama and also with the advice of United States Attorney General Sargent.

The *Federalship*, one of a fleet owned by the Consolidated Exporters, Inc., which recently figured in smuggling investigations by both the Canadian and United States governments, was watched by coastguards February 22, when it sailed from Vancouver, B.C., she changed her registry from British to Panamanian. At the time she was reported heading for Tahiti.

The coastguard cutter *Algonquin* was sent to follow the *Federalship* and later the cutters *Cahokia*, *Shawnee* and *Smith* were sent from here to aid.

Department of Revenue

New Name Is Proposed For Department of Excise and Customs

Ottawa.—A bill was introduced in the House of Commons by Hon. W. A. Eider, Minister of Customs, which will make certain changes in the organization of his department. The minister explained his department had three principal duties. One to collect customs, another excise, and the third income taxes. The bill provided that each of these divisions would be under the charge of a commissioner who would have practically the same power as a deputy minister. By this method, it would be possible to relieve the deputy minister of some of his duties.

Another provision of the bill changes the name of the department from that of Customs and Revenue to that of the Department of National Revenue, or the Department of Revenue. This change was made, Mr. Eider said, not from any prejudice because the department under the present name had been under attack, but because it was thought the new name more properly describes its functions.

Are Hostile to Soviets

Opposed by Majority of Russian People Says Kerenky

New York.—Alexander F. Kerenky, who headed the revolutionary government established in Russia after overthrow of the Czar, arrived on the Olympic for the purpose of studying American principles of liberty. He also intends to write for American consumption on the present day Russian situation.

Kerenky thought 99 per cent. of the Russian people were hostile to the Soviet. He expressed the opinion, however, that more good had come out of the Soviet "although it had turned sour" than could ever have come out of the Czarist regime.

Attempted to Introduce Bill

London.—An amusing incident occurred in the House of Commons when a group of anti-Russian Conservatives, desiring to break off relations with the Soviet, attempted to introduce a private bill to prevent British recognition of any foreign government indulging in anti-British propaganda.

Build Three Cruisers

Washington.—The appropriation for three new cruisers put into the naval bill by Congress over the recommendation of President Coolidge, received presidential acquiescence when Mr. Coolidge signed the bill.

W. N. U. 1971

Reindeer Investigation

Government Would Provide Food Supply for Natives of North Country

Ottawa.—A wireless message has been received by the Northwest Territories branch of the interior department from the Porolli brothers at Point Barrow, Alaska, reporting on the progress of their work on the reindeer investigation. These two Danish brothers are now on a 1,200 mile push across Alaska and the extreme North coast of Canada making an investigation into the possibility of moving reindeer from Alaska into Canadian territory to maintain the food supply for the natives. Game in that section of the Canadian North is in danger of extermination and the survival of the Eskimo is menaced. The two Porolli went into the North country last June and will not come out until the spring of 1925, when they will make their report to the Dominion Government on all phases of the reindeer question, including the commercial possibilities. It is expected that within a few weeks the little two-man expedition will be in the delta of the Mackenzie River. The men are trained naturalists and botanists and are sons of the governor of Greenland.

Vancouver Men Chosen

Four Posted to Special R.C.A.F. Squadron for Hudson's Bay Survey

Vancouver.—Four Vancouver men have been posted to the special Royal Canadian Air Force squadron which will fly into the Hudson's Bay country for a fifteen months' survey of ice conditions. It is announced. Squadron leader J. H. Tadhope, M.C., officer commanding the Vancouver unit, has been advised from Ottawa that Flying Officer A. Lewis, of Winnipeg, who came here recently as instructor for the training courses this spring, and Pilot Officer A. J. Ashton, who had been adjutant of the Jericho Beach station for some time, have been posted to the special squadron.

Lewis and Ashton will remain at Camp Borden in Ontario until June, in training for the flight.

Sergeant Perry, engine fitter and Corp. Semple, carpenter-rigger, have also been ordered to the Hudson's Bay flight. Both have been at Jericho Beach for some years.

It is understood that eight machines will comprise the squadron, which will establish its base at Hudson's Bay and do regular patrols from June, 1925, until October, 1925. Twelve officers and 50 men will be employed.

Britain Remains Neutral

Taking No Sides in Struggle at Shanghai Says Chamberlain

London.—Great Britain will continue to maintain an attitude of strict neutrality in the struggle between the contending Chinese forces, Sir Austen Chamberlain said in the House of Commons. Asked whether the United States is cooperating with British authorities in the defence of the international settlement at Shanghai, the secretary of foreign affairs said the United States was acting independently in defence of its own interests in China.

"There is no rivalry between the United States and ourselves," declared Sir Austen. "They act as an independent power and as they think proper."

Sir Joseph Hall asked whether this meant that the United States was unprepared to take action in the defence of Nationals of other countries.

"No, I have not said that," responded Sir Austen. He added that he was not inclined to define the attitude of a foreign power in unconsidered answers to such questions.

Pilgrimage to Holy Land

Ottawa.—Preliminary steps have been taken to organize a Canadian pilgrimage to join with the fourth annual Anglo-Catholic pilgrimage to the Holy Land this summer. This will be the first time that Canadians will take part in the pilgrimage officially.

Babe Ruth's Contract

New York.—Babe Ruth, home running king of baseball, came to an agreement with the New York Yankees under which he will receive a new three year contract at an annual salary of \$70,000.

PROPOSED TAX ON FURS FROM NORTH COUNTRY

Ottawa.—For the first time in 200 years a tax is to be placed upon furs from the Northwest Territories. Within a few days Hon. Charles Stewart, minister of the interior, will introduce a bill into the House of Commons to empower the Commissioner-in-council of the Northwest Territories to impose a tax per pel on furs.

At the present time about \$2,000,000 worth of furs are taken from the territories each year by trading companies without revenue to the federal government. The proposed tax is designed to meet to some extent the cost of maintaining the administration of Canada's northland. It is pointed out that every province of Canada has some sort of tax upon furs taken within its boundaries. The tax is to be upon exportations in order not to work any hardships upon the natives who depend upon skins for clothing.

Oil Magnate Hard Hit

Edward L. Doherty Will Lose Millions As a Result of Court Decision

Washington.—Edward L. Doherty will lose \$21,686,928 as a result of the Supreme Court's decision of cancelling his leases of Elk Hills, California, oil reserve from the navy department.

Of this amount \$9,800,000 in cash is held by the receivers, who have operated the reserve during the litigation.

It represents the value of the oil he received as a royalty payment for working the deposits of the reserve.

The balance represents expenditure made by the Doherty interests in mining the oil and constructing fuel tanks at Pearl Harbor, Hawaii, and the oil stored there.

Will Not Land in Nicaragua

London.—Sir Austen Chamberlain, foreign secretary, reiterated in the House of Commons that no forces would be landed in Nicaragua by the cruiser *Columbo*, which has proceeded to San Juan, where conditions are disturbed by civil war. He added that the *Columbo* would not remain at Corinto very long unless it should be needed as a refuge for British subjects.

Dominions Are Invited

Sydney, N.S.W.—An invitation has been extended to all the British Dominions to be represented at the opening of the parliament houses at Canberra, by the Duke of York on May 6. Premier Bruce has expressed the hope that Canada will send a minister.

Proposal of Western Livestock Men Opposed

Eastern Producers Against Changes Advocated at Regina Conference

Ottawa.—Eastern livestock producers and representatives of the live stock exchanges in this part of the country who met the minister of agriculture went dead against the proposal of the Regina conference of Western livestock men respecting contemplated amendments this season to the Livestock and Livestock Products Act.

At the Regina conference the main resolution adopted was that the actual administration of stockyards be taken out of the hands of the exchanges and placed directly under the Department of Agriculture. They favored marketing on the cooperative plan.

When this proposal was submitted to the conference of Eastern interests here they all objected to any such provision. They admitted the development of cooperative marketing and agreed to adequate provision for it being made in the Act, under department supervision, but they objected to the exchange being put out of business.

The Act is to be entirely revised this session and, on a variety of things, the opinion of the livestock interests is sought but marketing is the most important issue.

The Government will have to decide the matter but, meanwhile, the conference disclosed that the Western view is utterly dissimilar from that of the East.

Involve Questions of International Law

Run-Running Case Taken to Canadian Legation at Washington

Washington.—Run-running cases affecting Canadian citizens and ships of Canadian registry are beginning to find their way to the new Canadian legation here.

Formerly they were dealt with by the British Embassy, which will dispose of most of the cases begun before the Canadian legation opened. Others are being turned over to Minister Massey, the Canadian minister, and his staff at discretion of the Department of External Affairs at Ottawa.

Some of the cases involve difficult questions of international law and will form one of the most delicate tasks confronting the Canadian legation.

May Extend Term of Office

Ottawa.—Major-General J. H. MacDrien, chief of general staff department of National Defence, whose resignation was to take effect on May 1, will probably continue in office until June 1, as the result of the request of the Minister of National Defence.

Mecca For Champions

Quebec City has become the gathering place not only for winter tourists but for champions in every line of winter sports. The Canadian indoor speed skating championship races held there recently attracted over 25 prominent speed skaters from many parts of Canada and the United States.

The above photograph was taken at the Chateau Frontenac and shows at the right, Lella Brooks of Toronto, holder of practically all Canadian women's speed records and many world's records. At the left is Isabel McCulloch, another prominent Toronto speed skater. Between these two young ladies is another champion, a champion of the northern trails and none other than Mountie, the lead dog of the Chateau Frontenac dog team. Mountie has a long record of service with the Royal Canadian Mounted Police in the north, and always wins the hearts of the guests at the Chateau Frontenac.

APPROVE BUDGET BY A MAJORITY OF 23 VOTES

Ottawa.—The first budget of Canada's sixteenth Parliament has been carried in the house by a majority of twenty-three votes. Approval of the budget on division by a vote of 121 to 98 produced none of the elements of surprise. While defeat of the Coote amendment by 182 to 21 was likewise expected. The debate, however, was one of the shortest on record.

Liberals and Liberal Progressives backed up solidly in support of the budget on the division, while, with three exceptions, Conservatives, Progressives and members of other groups voted in opposition. The exceptions were: H. B. Ahearn, Labor; Calgary, B.C.; L. H. Joffe, U.P.A.; Lethbridge, and A. W. Neill, Independent, Comox-Alberta. All three voted for the budget. Henri Bonarrea, Independent, Lethbridge, voted against it.

As indicated early in the discussion the Coote amendment found its supporters in the U.P.A., Progressive and Labor groups.

The amendment was moved by G. G. Coote, U.P.A., Macleod, and seconded by A. W. Heape, Labor, Winnipeg North, following a conference of the members of the three groups who supported it.

Diamond Rush in South Africa

Gems Worth Quarter of a Million Found on Farm

Johannesburg.—Diamonds estimated to be worth £50,000 (about \$250,000) are reported to have been found in a hole on the Graafsefontein farm, reputed to contain the most valuable diamond deposits in the world. The hole, 25 feet deep, is said to show no signs of having been cleared of its diamond deposit.

The Graafsefontein farm in the Transvaal was proclaimed open to public digging last week, but there was a premature rush to stake claims before the signal was given. The stakes set out by eager peggers were pulled up and the claims nullified, and the authorities are considering the advisability of arranging another rush.

Raise Pool Payment

A New Rate of Initial Payments to be Made by Manitoba Pool

Winnipeg.—A new rate of initial payments to be made by the Manitoba Wheat Producers, Ltd., on all pool grain was announced by Mr. M. Maloney, manager. The revised rates become effective on March 9. The schedule follows:

Durums and durum mixtures, where durum predominates, 20 cents; all other grades of wheat, 15 cents; all grades of oats, eight cents; all grades of barley, six cents; rye, 12 cents; flax, 20 cents.

The increase affects both street and carload lots.

Coal Rates Case

Ottawa.—That the coal rate case is within the jurisdiction of the railway commission, and no direction will be given is the decision of the privy council of Canada in the request of Alberta and Saskatchewan for immediate disposal of the case by the railway board. Chief Commissioner McKeown made this announcement at the freight ways session of the railway commission.

Wants New Sash Head

Paris.—The Petit Parisien understands that Canada is anxious to provide a successor to Major G. W. Stephens, Montreal, in the presidency of the League of Nations commission governing the Saar. The newspaper believes that doubtless "Sir Austen Chamberlain, British foreign secretary, would support Ottawa's choice of a nominee."

Will Meet at Coast

Vancouver.—Final arrangements have been completed here for the holding of the sixth all-Canadian conference in child welfare in this city May 23, 24 and 25 in Victoria. May 23, at a meeting between Miss Charlotte Whitton, Ottawa, secretary of the Canadian Council of Child Welfare, and a local committee.

SOVIET RUSSIA PROPOSES THAT NATIONS DISARM

Geneva.—Soviet Russia has challenged the entire world to disarm.

The Russian delegation to the disarmament commission of the League of Nations offered to destroy her land, sea and air forces, provided other nations would do the same.

The stupendous proposal left the other delegates bewildered and gasping for an answer, but with the impression that Russia had woven the peace fabric of Europe. However, the general impression, except possibly among the Russians, is that total disarmament is an idealistic dream for the present at least. Nevertheless, there is everywhere a disposition to give the Soviet leaders full credit for their readiness to wipe out armaments.

That the Russians themselves realize their plan to lay down all arms and make their manufacture impracticable is too idealistic for the present, at least, was shown in the opinion of many by the fact that they voiced their willingness to negotiate in a piecemeal form for the reduction of armament. If their radical proposal proved too revolutionary, and that they did not insist upon immediate consideration in detail of their sweeping programme. Such consideration was adjourned until the next session of the commission early in 1925.

Furthermore, although considering that complete disarmament is the best guarantee of security, the Russians, in a spirit of conciliation agreed to send an observer to the special committee on security. They will tackle the problem of how best to increase guarantees of security in order that the nations of the world may be more willing to cut down armaments when the international conference is convened, probably some time next year.

Cost Of Canada's Army

Expenditures For Year Total \$10,422,651 According To Report Ottawa.—Military services in Canada during the year 1924-25 necessitated expenditures totaling \$10,422,651 according to the annual report of the Department of National Defence. This figure does not include \$809,154 for general air services. In the year 1917-18 the grand total of military service expenditures was \$2,027,427 and for the next two years the expenditures were in excess of \$300,000,000.

Flying operations by the Royal Canadian Air Force during the year showed a total of 5,229 hours of flying time, covering service, Long, forest protection, aerial photography and fishery protection.

The active militia strength on March 31, 1925, was placed at 3,129 ranks, other than commissioned officers.

Law Serves Its Purpose

Sacramento.—The new state law requiring a three-day notice before a marriage licence can be issued has reduced the number of marriages in California by 20 per cent. During the first month it was in effect, the reduction brought a decrease of 90, indicating that many elopements had been frustrated.

Reproduce Royal Christmas Cards

London.—Reproductions of the Christmas cards prepared for the Royal Household by a London firm are again to be available this year to the members of the public by permission of the King and Queen, the Prince of Wales, Princess Mary and the Duke and Duchess of York.

Jewelry Found in Cells

Barrie, Ont.—Stolen jewelry has been located hidden in the cells at the county jail occupied by Fred Fryer and Dennis Berkin, who were sentenced to two years for the theft of several rings. The men had refused to tell the whereabouts of the missing rings.

Must Pay License Fee

Monroe, La.—Dr. H. Standiford Claunch, San Francisco, will have to pay a transient traders' license fee according to a decision reached by city council here. The doctor is giving a series of lectures in this city on matters pertaining to health.

W. N. H. 1710

Commuter Lost Fight Against New Ruling

Was Advised To Submit To Border Immigration Law

Buffalo, N.Y.—The first attempt of an alien to fight the border immigration ruling was lost when Judge Hazel, in district court, dismissed an application for a temporary injunction to restrain immigration officers from enforcing the ruling.

The injunction was sought on behalf of James Kemp, of Niagara Falls, Ontario, who is owner of a business establishment in Niagara Falls, N.Y. Judge Hazel, commenting on the action, advised Kemp to submit to arrest for illegal entry across the Niagara river and then to apply for a writ habeas corpus in order that his action may be brought before the district court.

The new immigration ruling which became effective December 1, provides among other things, that Canadian aliens, who commute to this country, must have visas and pay a head tax of \$25.

Exhibition Dates Set

Announcement Made At Annual Session Of International Association

Chicago.—The Canadian National Exhibition will be held at Toronto, August 25 to September 8, next year according to an announcement made by the International Association of Fairs and Exhibitions in annual session here.

Other dates for Canadian exhibitions decided upon for associations affiliated with the international association were announced as follows:

Calgary exhibition and stampede, Calgary, July 9 to 14.

Central Canada exhibition (Ottawa), August 21 to 25.

Edmonton exhibition, Edmonton, July 16 to 21.

British Columbia provincial exhibition, New Westminster, B.C., September 3 to 8.

Saskatchewan provincial exhibition, Regina, July 30 to August 4.

Montreal Merchants

Outwit Burglars

Leave No Money In Store After Closing Hours

Montreal.—Thieves operating in Montreal have, for the past few months, apparently acquired a penchant towards repeating their exploits in the same establishments. But the harassed shopkeepers have arranged in their own way means of making the work of the marauders as unremunerative as possible.

Over last week-end thieves entered a branch of a chain grocery company and carried the safe away. That was their fourth visit in two months. The management, however, had of the employees carry the money home, so that the strong-armed men received nothing but a lot of trouble for their pains. On the previous three visits the robbers secured \$500 and three safes.

Changes In British

Cabinet Inevitable

Rumor Is Causing Much Speculation By London Newspapers

London.—A cabinet shuffle is inevitable early in the coming year and already newspapers are speculating on the changes. It appears probable that Cliffride Lister, Mr. Bridgeman, first lord of the Admiralty, and Col. Ashley will be elevated to the House of Lords, and that their position in the cabinet will be filled by younger men. Progressive members of the Conservative party are making demands for better representation in the government, and are very much dissatisfied with the present administration. This feeling is resulting in considerable dissension within the party, which seems to be united before the next election looms in sight.

Has Approved Agreement

Ottawa.—The Government has approved by order-in-council the agreement between the Canadian National Railway and the City of Vancouver, announced Hon. C. A. Dunning, Minister of Railways and Canals. One of the provisions in the agreement calls for the building of a new hotel in Vancouver at a future date.

Refused Decorations

COL. T. E. LAWRENCE

who lived with the Arabs with a pistol on his head, organized them to drive the Turks out of Syria during the war and made Emir Faisal king of Iraq, and then refused the decorations offered to him by King George according to recent disclosures. He is said to feel that the Arabs didn't get a square deal because they fought under him with the understanding that they would be allowed to keep Damascus and Syria after the war.

Casualties Heavy In Ukraine Revolution

Has Cost 5,000 Lives In Three Months Says Report

New York.—Suppression of a revolt in the Ukraine at a cost of 5,000 lives during three months of bitter fighting is reported in a special copyrighted despatch from Kishineff, Bessarabia, to the New York Times.

The despatch telling of massacres and street clashes in towns along the Rumanian boundary line, confirms in large measure recent despatches to the Associated Press from Bucharest citing an account of fighting in the Ukraine reported by the Rumanian newspaper Dimineata.

Soviet reinforcements, which have arrived in the Ukraine in the past two weeks turned the tide of the revolutionary movement and after a series of clashes in various towns the revolt was crushed out in a bloody disaster for the revolutionaries.

Soviet officials have made denial of any extensive revolt in the Ukraine, specifically denying any fighting at Kamenev-Bolshevik, but the sound of prolonged firing beyond the Ukrainian hills can be heard daily from the Rumanian side of the frontier, the despatch says.

A Ten Thousand Dollar Two-Year Old

The international aspect of the Royal Winter Fair at Toronto was emphasized strongly this year by the exhibition of a large shipment of champion stallions from England, Scotland, France and Belgium. The horses, including Cydades, Perch, Safford, and Belgians, were brought to Canada in October by W. J. McCallum, of Brampton, Ontario, and Regina, Sask. The shipment arrived on board the Canadian Pacific freighters Bolingbroke and Bosworth, and represented who had considered the finest alignment of horses ever to cross the Atlantic.

A notable stallion with the group is "Lord Willington," photographed above, a Clydesdale champion many times over and considered one of the finest ever bred over-seas. While the shipment proper, including over 100 horses, was sold by Mr. McCallum throughout the west this winter, "Lord Willington" will be taken back to Scotland by the owner to be used for breeding purposes. This horse was purchased by Mr. McCallum at a price exceeding \$10,000. It was the only two-year-old winning double championships in Scotland this year, being champion at the Royal Show, Newport, Wales, and champion at the Kilmorock Show.

Mr. McCallum's optimism for the horse industry in Canada has prompted him to spend about four months each year touring the four countries mentioned and making a personal selection of the stallions available for export.

Hazing Barred From Agricultural College

Hon. J. S. Martin Gives Ruling Affecting Guelph School

Toronto.—Hazing or initiation practices at the Ontario Agricultural College, Guelph, have been banned by Hon. J. S. Martin, Minister of Agriculture.

The minister's action was prompted by the recent hazing of Edward Beddoes, young English student at the institution who was imprisoned in a pig crate and "auctioned" off in front of a crowd in the streets of the city a short time ago.

Mr. Martin takes the ground that hazing is, in effect, little short of mob law in a mild form and states that students who participate in any future affairs of this kind may be immediately expelled from the college.

Serious Floods Near London

People In Low Lying Country Forced To Leave Homes

London.—Serious floods in many places, especially in the low country to the West of London, followed a heavy 24-hour rainfall which accompanied a black fog over the city. The rainfall exceeded half of the average for the whole of November.

The high river Brent burst its banks, flooding scores of houses near Greenford. Police entered the district quickly to awaken the inhabitants, who had to leave their beds hastily to save what they could.

Miles of the district were under water, and the roads were impassable. The local electric plants were flooded, cutting off light and increasing the difficulties of the area.

Canadian Doctors In London

Will Examine Immigrants From England Before They Sail

London.—Twenty doctors from Canada have arrived here for the inspection of potential migrants from this side of the Atlantic to the Dominion under the pre-embarkation medical examination scheme which has been placed in operation by the Canadian department of public health.

It is hoped that by testing the fitness of prospective immigrants before they sail, the possibility of their rejection on arrival in Canada will be practically eliminated.

World's Chess Champion Buenos Aires.—Alexander Alekhine, Russian chess-master, won the world's chess championship when Jose R. Capablanca, the title-holder since 1921, resigned the thirty-fourth game of the series without resuming play, adjourned after 81 moves. The score was six to three victories. The 25 drawn games did not count.

OATS TROPHY AGAIN WON BY HERMAN TRELLE

Chicago.—Canada retained the oats sweepstakes for the best oats grown on the North American continent through Herman Trelle, Wembley, Alberta, at the International Grain and Hay Show here, L. E. Patterson, Victor, Montana, taking the reserve championship.

Mr. Trelle kept the oat crown which he won in 1925 with a fine sample of Victory oats weighing 39.5 pounds to the bushel, United States measure. Canada has won the oats championship six times, and Montana twice. By winning today the Canadian exhibitor stopped Mr. Patterson from taking the trophy as his own property for a third win. Next year Mr. Trelle will have an opportunity of lifting the trophy.

All the winning seed grain samples are placed in a gold plated glass case under lock and key in gold plated boxes. The blue ribbons denoting championship, taken by the exhibit are laid on top of the grain. Above the glass is a big map with golden crowns showing that the field peas championship went to Saskatchewan and the oats went to Alberta.

George Avery, Kelso, the only Saskatchewan entry in early oats, was the first Canadian exhibitor, taking tenth prize. L. E. Patterson, Victor, Montana, won and Maurice Lacombe, Birle, Man., took fourth and fifth prizes. L. E. Patterson, Victor, Montana, won and Maurice Lacombe, Birle, Man., took fourth and fifth prizes.

Norwegian Scientists

Going To Antarctic

Will Make Study Of Continent Near South Pole

London.—A party of Norwegian scientists and explorers have left Norway for Cape Town, whence they will start on board the Antarctic steamer Norge to explore the South Antarctic continent. They will explore from Enderby Land round the continent to the 120th degree West, following the route of the Bellingshausen expedition of 1821.

Afterwards they will go to the South Shetland Islands to study the flora and fauna. The scientific leader of the expedition will be Professor Hildebrandt and the captain of the Norge will be Captain Hornvold.

Several naturalists will be included in the company.

Would Abandon His Title

Japanese Prince Holds Himself Responsible For Bank Failure

Tokio.—Prince Iwano Matsukata, holding himself responsible for the failure of the fifteenth bank, called Peera Bank, because its stockholders and directors numbered most of the Japanese peerage, has requested permission to abandon the title.

The Prince, who was managing director of the bank, has decided to sell his remaining property, donating the proceeds to the settlement of the bank's affairs. The Prince, who was a multi-millionaire before the bank's failure last April, is now living in a small house on the outskirts of Tokio.

Vancouver Is Recommended

Vancouver.—Officials of the Imperial Aeronautical Association of Japan have been called by Y. Miura, air attaché of the Japanese embassy at Washington, recommending Vancouver as the terminus of the Japan-Pacific flight which will be attempted next year.

Shipping Milk To Orient

Vallejo, Cal.—Americans living in the Orient soon will have fresh milk from container cows. A dairy company here is shipping several hundred gallons of milk to Shanghai and Singapore, using the same methods of refrigeration employed by fruit exporters.

Large Orange Shipment

Vancouver.—Importation of Japanese oranges through Vancouver reached a new high mark when three steamers arrived from the Orient recently carrying a total of 500,000 boxes for distribution in British Columbia and every other province in the Dominion.

JUDICIAL SALE OF FARM PROPERTY.

There will be offered for sale by Public Auction by W. M. Washburn at the Postoffice in Stony Plain, Alberta, on SATURDAY, the 24th Day of DECEMBER, 1927, at 2.30 o'clock in the afternoon the following lands: S.W. 1/4 & N.W. 1/4, Qr. 7, both in Tp. 52 Rg. 1 W. 5th Mer, reserving mines and minerals in the S.W. Qr. 18, and coal in the N.W. Qr. 7. AND the S.E. Qr. 12 and S.E. Qr. 13 both in Tp. 52 Rg. 2 W. 5th Mer, excepting out of the N.E. Qr. 12 40-100 acres and 3-27-100 acres for roads and reserving mines and minerals and out of the S.E. Qr. 13 reserving coal 402 acres more or less. The property will be offered for sale at an upset price of \$14,450.00. The Vendor is informed of the following particulars: The property is about 10 miles southwest of Stony Plain and about 3 miles from the nearest school. About 230 acres are under cultivation, there is a well, and the land is fenced with 2 and 3 wires. There are the following buildings: 1 1/2 story house 29 x 36, log, boarded up, shingle roof; log granary 24 x 32 shingle roof; horse stable 22 x 24; cow stable 22 x 22; hen house 10 x 24. Terms - The purchaser will pay down at the time of sale ten per cent of the purchase price to the vendor's solicitor and the balance into Court within 60 days of the date of sale without interest, or in the alternative 10 per cent cash as aforesaid and the execution of a mortgage for \$2000.00 for five years, with interest at 7 per cent per annum, and the remainder of the purchase price to be paid into Court within 60 days from the date of sale without interest.

In other respects the terms and conditions of sale will be the standing conditions of sale of the Supreme Court of Alberta, as approved by the Master.

For further particulars apply to F. W. Lundy, Barrister, Stony Plain, Alberta.

Dated at Edmonton, Alberta, this 25th day of November, 1927.

LESSON No. 19

Question: Why is emulsified cod-liver oil so wonderful a food-tonic for young girls and women?

Answer: Because it abounds in nourishing factors that are particularly beneficial to people prone to anemia and other conditions due to malnutrition.

Keep your system vitamin-nourished—take

SCOTT'S EMULSION

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XII—Continued.

There was a flat stone by the river to which she often took her English book to read. For she loved the sound of the flowing water. It brought her back to the elemental things of life, and told her again the stories she had heard when she was a child—stories of man's long struggle with the wilderness, flood, famine and cold—and in its bluest murmurs Helmi could discern a warning note. It was trying to tell her that winter was coming, plagues and cold, and that now was the time, when the grass was green and the water running, to build protection from the cold, and lay up stores against that long, white, downy time. And although the river spoke only of the winter, Helmi knew it had a deeper meaning—and no matter how hard she studied her English book she could not altogether quell the voice of the years.

The velvety breezes of summer, which went by her—some cool and fragrant with the wolf willow which grew thick around the edge of the saucer; some hot, like a blast from an oven—brought the same story and the same urge, filling her with a discontent and a vague restlessness that was new and disturbing. When she could bear it no longer Helmi always wanted to drown the voices by a new orgy of cleaning at the boarding-house. She had never heard of sublimation, but she knew that something mysterious and uncontrollable drove her into activity, and in it she found peace.

Helmi was happiest when she saw a long day's work ahead of her, nerve and muscle tiring—a day's work that would send her to bed so tired and sleepy that the long black night would go by like a flash, bounded on one side by the moment her head touched the pillow, and on the other side by the first whirr of the alarm clock. She had done all she could for her own little box of a room up under the rafters. She had braved a mat for the floor, and hung blinds of four sackings, washed white and rolled on a red crocheted cord. She had also made holders for her clothes out of rolled newspapers.

One day Helmi was on her way home from the teacher's house after a lesson in the proper method of let-

Women, Your Manifold Duties Require Strength

St. Catharines, Ont.—"During my early married life Dr. Pierce's Favorite Prescription was very helpful to me as a tonic and restorative."

"I had become all run-down, my nerves were all upset, I could not sleep, and was weak and miserable. I was advised by my mother to try Dr. Pierce's Favorite Prescription and it relieved me of the nervousness and made me a well, strong woman. Since then I have always recommended it to weak women."—Mrs. M. F. Slack, 5 Francis St., All drugists. Fluid or tablets. Write the Faculty of Dr. Pierce's Invalids Home in Buffalo, N. Y., if you feel the need for free advice.

Ever tried Dr. Pierce's Pleasant (Laxative) Peppermint 60 Pellets for 30c.

Cottage Hospital For Women Lepers

Romance Surrounds Gift Of London Postman To Indian Colony.

Francis Cardinal, a London postman, who delivers letters in Goswell Road, has called for his car on special leave to open a cottage hospital which he has built for women lepers.

Mr. Cardinal served in India during the war, and was impressed with the sufferings of the ostracized lepers. After the war he became acquainted with an old woman of nearly eighty, who lived next door, and was also interested in lepers. A bond of sympathy grew up between them, and Mr. Cardinal became a sort of adopted son.

A short time ago the old woman died, and left him a small sum of money, which Mr. Cardinal has put with his own savings, making just enough to build a cottage hospital at the Manamadurai leper colony, South India, at a cost of £125 and 7s for his trip to open it.

Children's Colds

Best Treated Externally

That's why modern mothers prefer Vicks Vapo-Rub. It cannot upset delicate stomachs. Rubbed on throat and chest, it acts two ways at once:

- (1) Its healing vapors, released by the heat, are inhaled direct to the air passages;
- (2) It "draws out" the soreness like an old-fashioned poultice.

VICKS VAPORUB
OVER 25 MILLION JARS USED YEAR

morning—a man at work—and now a thunderstorm! God speaking to the wicked! God would not like to see a man building his house on Sunday, and yet Helmi knew the man felt it wasn't wicked—he could not help wanting to build—she knew how he felt—she felt too. Now she was running down stairs and out into the storm.

The sky seemed to split wide open above her head as she ran; the heavens were lashed with knotted cords of flame swung by invisible giant hands. But Helmi ran on. She must get to this man and bring him in. She thought of Peter Satch all huddled and burned beside his mouth. She called to him above the storm, and he must have heard for he turned toward her, smiling. Then came a flash that blinded her and turned the world into blackest night. Something fell into her arms.

When Helmi opened her eyes a strange figure sat on her bed in her arms and feet. She was sitting on the pile of lumber, holding someone in her arms, someone with flame pits in the hair, and whose eyes were closed. A cry broke from Helmi's lips. "Jack Doran!" she called; "Oh, Jack Doran, is it you?"

She carried him into the house, his weight seeming nothing to her in her arms and feet. She was sitting on the pile of lumber, holding someone in her arms, someone with flame pits in the hair, and whose eyes were closed. A cry broke from Helmi's lips. "Jack Doran!" she called; "Oh, Jack Doran, is it you?"

She carried him into the house, his weight seeming nothing to her in her arms and feet. She was sitting on the pile of lumber, holding someone in her arms, someone with flame pits in the hair, and whose eyes were closed. A cry broke from Helmi's lips. "Jack Doran!" she called; "Oh, Jack Doran, is it you?"

She carried him into the house, his weight seeming nothing to her in her arms and feet. She was sitting on the pile of lumber, holding someone in her arms, someone with flame pits in the hair, and whose eyes were closed. A cry broke from Helmi's lips. "Jack Doran!" she called; "Oh, Jack Doran, is it you?"

another long sleep. The men came to see him and professed much advice. "Lots of fresh air," they said, "and keep everything quiet, and just leave him alone." Helmi, rolled in a blanket, slept on the floor. The men had suggested carrying Jack to the bank-house, but she had objected. She didn't want sleeping him, she said, and the bank-house was noisy.

(To Be Continued.)

Honored By France

Memorial For Woman Who Risked Death Daily During War

At home there was "unlucky" one of the war's most fitting monuments. It was to a woman of Lille, Louisa de Butignies, who as bravely as any soldier on the battlefield laid down her life for her country. During fifteen months from the time of the outbreak of the war she worked behind the German lines, bringing men across the Dutch frontier to serve the allied armies and give military information of the most valuable character.

Death risks were her daily adventures. Once she had to swim a deep canal on a winter's night to avoid a German sentry. Her devices to elude the passport officers were innumerable. In some of her adventures street urinals were her allies. They were slipped through sentries and bring back a passport which could be used again, or would divert a sentry's attention at a critical moment when her subterfuges had been discovered.

She was condemned to death, and though the sentence was commuted, she died neglected in a prison in Cologne from pleurisy only two months before the allied victory for which she had worked without flinching.

Proved Himself a Hero

Commander Byrd Holds Honor For Three Life Saving Feats

Commander Richard Byrd, the hero of the most important, from a practical point of view, of the recent Atlantic flights, is a very modest man, but he holds the honor for three life-saving feats. Twice he has saved men from drowning—once in a sea alive with sharks—and when a Washington theatre roof fell in burying many people, he wormed his way in beneath a gallery, which threatened to fall at any moment, to extricate a man from under a heavy iron beam. For three hours he worked, although every movement he made increased the danger.

The Oil For the Athlete.—In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

A Logical Question

Mr. Harry Tate has a particular penchant for the yarn in which he appears as the victim. This is quite one of his kind.

"Care your bag, sir?" asked an eager youngster.

"No, thanks," Tate replied.

"I'll carry it all the way to the station for twopence."

"I tell you I don't want it carried."

"Don't say that."

"No, I don't!"

"Then," demanded the boy, with perfect logic, "what are you carrying it for?"

Minard's Liniment for Grippes.

Want Canadian Graduates Supply is Not Sufficient For Demand.

Say Authorities

American college youths may be proving themselves as it has been declared, unfitted for business, but certainly the Canadian graduate is being snapped up by industry as fast as he is produced, authorities said when asked to answer C. W. Warren, New York editor and writer, who recently said that modern universities were "unfitting college men for practical business." The supply of Canadian college graduates was not sufficient for the demand it was shown in support of the contention that Canadian students were an asset and successful in business.

It is estimated that the addition of 2 grains to an ear of wheat by Luther Burbank, has added \$5,000,000 to the world's annual wheat crop.

Little Help For This Week

"If you love Me, keep My commandments."—John xiv, 15.

Do as thou wouldst be done unto; Love God, and love thy neighbor; Watch and pray.

These are the words and works of life; this do.

And live; who doth not this hath lost heaven's way.—Henry Vaughan

When a man is told that the whole of religion and morality is summed up in the two commandments,—to love God and to love our neighbor, he is ready to cry, like Charab in Gehir, at the very thought, "Is this the sea, this the mighty ocean? Is this all?" Yes, all; but how small a part of it do your eyes survey! Only trust yourself to it, launch out upon it, sail abroad over it, you will find it has no end; it will carry you round the world.

—Julius Hare.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child. Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R. R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home, where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

As a Carnivorous Cow

A German newspaper tells of a carnivorous cow found near Bremen. Discovered a crate of geese standing before the barn, the cow dropped the hay she was chewing, edged her way to the crate, and had devoured five geese before the farmer noticed what was happening.

Always Ready and Reliable.

"Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is soon absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly cured. This same oil is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always."

Saskatchewan Means "Rapid"

Saskatchewan, the name borne by the great river which rises in the Rockies in Alberta and flows through Saskatchewan and Manitoba into Lake Winnipeg, is an Indian word meaning "rapid" or "swift-flowing."

Was Very Weak NERVOUS AND MELANCHOLY

Mrs. Geo. McKenzie, Campbellford, Ont., writes:—"A short time ago I was troubled very badly with my heart and nerves, the cause of it, I was going through the change of life."

"I was very weak and melancholy, I was a heavy load, and I did not sleep well."

"I was advised to try

so I sent at once for a box; took them and got another, and before I was well I felt good, my nerves are fine, I sleep and my heart and I can sleep well. I cannot recommend them too highly to those suffering as I did."

Price 50c. a box at all drug stores and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

MILBURN'S HEART AND NERVE PILLS

AN ASSURANCE TO ALL FORD OWNERS

We wish to assure the Ford owners of this community that as long as they drive their Model T cars, a full stock of genuine parts will be available, and expert Model T service will be maintained. This applies not only in our own garage, but throughout the Dominion-wide Ford dealer organization.

The New Car which will soon be on display in our showrooms is the ultimate expression of automotive engineering and design made possible by the 16,000,000 Ford cars that have gone before it.

SUMMERFIELD & MAYER.

Hockey Notes.

Stony's Senior hockey team crossed sticks with Waltham Leagueteam Sunday evening in a practice game, at the local rink. Final score: W-L 3, Stony 2 goals. Stony: B. Gibbons, A. Witherspoon, R. Heichen, C. Umlach, J. Miller, C. Anderson, Hy Trapp, W-L: Rosnau, P & K Enders, Conrad Fuhr, W. Miller, and J. C. Ulmer. The same two teams have arranged for a game next Sunday.

Copconia College hockeyists will play a series of games with the local teams during the coming holidays. The Collegians have had a good winning streak, this season.

Stony Plain and District.

14 SHOPPING DAYS ONLY, TO CHRISTMAS

Mrs E J Kibblewhite, who has been on the teaching staff at the local school since September, is severing her connection at the Christmas recess, and will reside in Edmonton.

Tonight, Dec. 8th, the Holborn U.F.W.A. are holding a bazaar and dance. Guesses will be sold for 25c on a Stat quit, the one guessing the correct number of beans will be the winner. Tyrrell's orchestra will furnish the music.

A case of cruelty to animals, in the Leasowe district, was investigated last week by Officer Moses. A valuable registered collie, the property of Mr H C Murray, had been beaten so badly it had lost an eye and received other injuries. A 15-year-old youth of the neighborhood named Herbert was suspected, and on being charged with the offence, admitted his guilt. As Mr Murray did not wish to prosecute, the lad was dealt leniently with on promising not to repeat the offence.

M M Meeklenburg, the well-known optical specialist, will be at the Royal Hotel, Stony Plain, on Friday, November 25th. See him and see well.

Here and There

The "Never-Rot" potato, a variety planted in Yarmouth and Digby counties, Nova Scotia, this year, is reported as showing up to its name, coming through flood damage practically unharmed.

United States farmers receive about 15 cents a bushel less for their wheat than Canadian farmers, because of higher railway rates, according to Senator Brookhurst of Iowa, speaking at Washington recently.

The Liard River district in the extreme north of British Columbia can produce excellent crops of grain and vegetables, it is stated by the Department of Agriculture of British Columbia, following experiments carried out in conjunction with the Royal Canadian Mounted Police. Specimens of grain have been received here.

Ocean tonnage to carry 38,000,000 bushels of Western Canadian wheat via the Pacific to the United Kingdom and Europe has been booked for November, December and January. During December alone tonnage for 20,000,000 bushels has been fixed and shipping men believe that a hundred vessels will be required for this.

"Indian Golf" will be a novel form of the Royal and Ancient game to be introduced this winter at the Chateau Frontenac, Quebec City, for the enjoyment of the winter sports tourists. The game will be played on skis and snowshoes, and over a course laid out in the snow. Targets will replace holes and bows and arrows will take the place of golf clubs and balls.

The Poultry Department of the University of British Columbia announces the sale of a white Leghorn hen for \$500. She is not the famous Hen No. 6, but F. 319 and was exhibited at Ottawa last summer. Last year she laid 385 eggs in 365 days; and as she weighs just four pounds her purchase price was \$125 per lb. F. A. Sansome, of Greenwich, Conn., was the purchaser.

The Government's final crop estimate is now: Wheat, 444,000,000 bushels, as compared with an estimate of 458,000,000 in September and last year's actual yield of 409,000,000; oats 452,000,000 bushels as against September's estimate of 502,000,000 and last year's actual yield of 383,000,000. Barley is put at 98,000,000 bushels as against 99,000,000 last year and rye at 16,000,000 bushels against 12,000,000 last year.

The fourth of the five new freighters being built for the Canadian Pacific Steamships was launched recently at the yards of Barclay, Currie & Co., Glasgow. The S.S. Beaverhill will make her maiden voyage from Glasgow to Saint John on March 10, 1928. With her four sister ships the Beaverhill will be in a weekly service between Canadian ports and London, Hamburg, Havre and Antwerp. She will be an "all-weather" vessel with a speed of 14 knots and is built to the highest class of Lloyd's specifications.

His Excellency Lord Willington, while attending the Royal Winter Fair at Toronto, recently, noticed in the entry list a stallion under the name "Lord Willington." His Excellency expressed a desire to inspect the animal which was paraded by its owner, V. J. McCauley, of Brampton and Regina. The two-year-old Clydesdale was purchased by the owner in Scotland last summer and brought out on the Canadian Pacific "Empress" in October. The animal purchased for \$10,000 and was included in a shipment of over 100 purchased animals.
